

FOLDRite™

TEMPLATE MASTER

for Adobe® InDesign®

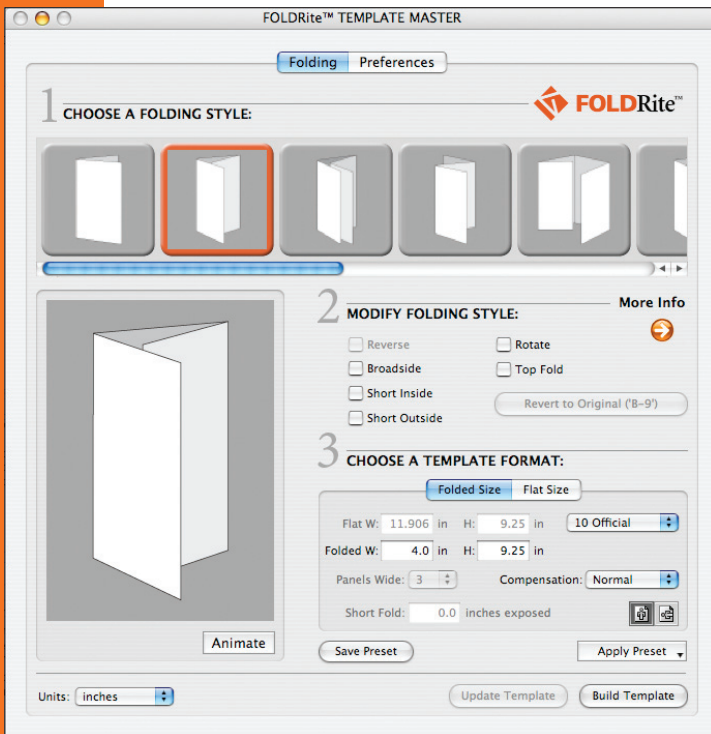

A PRODUCTION TOOL FOR ADOBE INDESIGN

FEATURES

- Eliminates the need for manually calculating folded template sizes—no more math.
- Significantly reduces production time and errors associated with creation, proofing, and correction of templates.
- Eliminates costs associated with creating or repairing file manually
- Fast, accurate custom template creation
- Industry-approved folding styles and algorithms
- Fosters better communication between printers and designers

BENEFITS

- Simple to install and use
- Swift return on investment
- Supports InDesign CS3, CS4
- Educational information provided for all folds
- Supports sustainability with more accurate files, creating less production waste at the bindery
- Ability to offer more folding options to your clients
- The ability to convert pre-existing InDesign files into FOLDRite™ templates

FOLDRite™ Template Master for Adobe InDesign can be purchased in single licenses or in multi-seat bundles at reduced rates. Education discounts also available, however, you must qualify as an educational institution, an educator, or a currently enrolled student to receive the discount. Contact teachers@foldfactory.com for more information about education pricing.

Product Overview:

FOLDRite™ Template Master for Adobe InDesign is a plug-in for InDesign CS3 and CS4. It provides users a quick and easy way to choose a folding style, customize it to their specific needs, and build production-ready folding templates instantly. Template Master is easy to install and use, and is accessible from the File menu in InDesign.

Template Master is the only dynamic, custom digital folding template creator for graphic arts professionals. With 85 folding styles to choose from, FOLDRite™ templates are fully-compensated for the folding process using industry-approved settings, and come complete with fold marks and panel cues in the slug area. Flash animated folding illustrations, the option to save presets, and useful educational information about each folding style helps designers to visualize, to stay on schedule, and on budget.

The FOLDRite™ Template Master industry-approved folding algorithms and document creation technology saves countless hours and fees associated from building comps, calculating folding compensation, calling printers or binderies for advice, fixing errors, and recreating bad files. Useful Update Template feature can even modify existing InDesign files and turn them into FOLDRite templates.
